

Choose right fit right for a Kidsafe ride

Forward Facing Child Seat

For children weighing
around 9kg to 18kg

(From ages 6 to 9 months
to approximately 5 years)

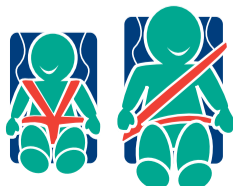

Booster Seat

For children weighing from
around 18kg, from about
5 years, until they fit correctly
into an adult seat belt
(at around 145cm tall)

Using a restraint that fits your child correctly significantly reduces their risk of injury in a car crash. So choose right, fit right and keep them as safe as safe can be.

Sizes and ages are provided as a guide only. Have restraints fitted and checked by an RTA Authorised Restraint Fitter and refer to restraint manufacturer's instructions.
