AND ACCESSORIES

LEGAL
REQUIREMENTS
AND AUSTRALIAN
STANDARDS

ANCHORAGE
POINTS AND
ATTACHMENTS

OLDER AND SECOND
HAND RESTRAINTS

HANDS-ON RESTRAINT
INSTALLATION
SESSION

WHO SHOULD ATTEND?

Suitable for any education, health or community professionals required to transport children as part of their job role.

This one day workshop will provide staff with the knowledge and skills to select, adjust and install suitable child car restraints for transporting children in their care.

This training is aligned to the unit of competency:

Unit Code	Unit name
RSCICR301A	Provide information and advice on correct child car restraints

This unit forms part of the nationally recognised short course *52778WA Course in Type 1 Child Car Restraint Fitting*. It is delivered as a stand-alone unit for those wishing to inform the community about correct child restraints but **does not qualify the participant as a Transport for NSW Authorised Child Restraint Fitter**.

In addition to the unit of competency requirements, a practical skills session will be conducted to demonstrate learning and practise restraint installation techniques for safely transporting children.

On successful completion of this training, participants will receive a Statement of Attainment for one unit of competence as outlined above.
