Child Car Restraint Training

This one day training will provide participants with the knowledge and skills to install and select suitable child car restraints from a specific range of restraints for transporting children in their care.

Who should attend?

Suitable for any education, health or community professionals required to transport children as part of their job role. It is designed to be hosted by employers who wish to ensure their staff have the required knowledge and skills to safely transport children in their care.

Course Aim

This unit aims to provide participants with skills and knowledge about the importance of correct selection and use of child car restraints. Information is to be provided in the context of current legislation and regulation.

In addition to the unit of competency requirements, a practical skills session will be conducted to assess restraint installation techniques for safely transporting children.

Course Information

- CRFP301 Provide information and advice on correct child car restraints

This unit forms part of the nationally recognised short course *52862WA Course in Type 1 Child Car Restraint Fitting*. It is delivered as a stand-alone unit. It **does not** qualify the participant as a Transport for NSW Authorised Child Restraint Fitter.

Entry Requirements

This course requires the satisfactory completion of oral, practical demonstration and written tasks. There are no specific entry requirements for *CRFP301 Provide information and advice on correct child car restraints*, however a general command of spoken and written English is required.

On successful completion of this training, participants will receive a Statement of Attainment for unit of competency outlined above.

Cost

\$330pp (Inc. GST)
